<b>System Setup CD</b>				
I100102	5060296410001	Evaluation of the channels. Phase test. Test of loudspeaker positioning and surround sound. Verification of the frequency range. Six pieces of music from the Opus3 label for the system test after calibration.	29,90 €	
<b>Mains Noise Analyser</b>				
MNA DE 220	5060296410988	This device measures the interfering parts in the power supply and displays them in parts per thousand. An inferior power supply affects the sound and picture quality of high-quality AV components.	1.020,00 €	
<b>Set of RIAA Filter + IsoTek's Full System Enhancer CD</b>				
B401005	5060296410797	<b>"Ultimate play-in/ burn-in solution for phono preamplifiers"</b>	99,95 €	
<p>All products benefit from a burning in/running in period of time. Phono stages used with analogue replay are no exception. With this small yet effective Blue Horizon RIAA Filter you can now directly connect your CD player to your phono stage and put CDs on repeat.</p> <p>Historically to optimise a phono stage new owners would need to play LP records for at least 72+ hours. This would require LP records to be played on turntable, causing record wear, cartridge wear and the need to turn the record over, approximately every 15 minutes. With the small yet effective Blue Horizon RIAA Filter you can now directly connect your CD player to your phono stage and put CDs on repeat. The most effective way however is to use this product in combination with the IsoTek Full System Enhancer CD that also features a dedicated Phono Stage burn-in track.</p> <p>Each channel can be conditioned independently giving great control and an easy performance boost. Easy selection between Moving Coil and Moving Magnet cartridge designs.</p> <p>Simply plug the Blue Horizon RIAA filter into the input sockets of your phono stage, and connect your CD player using standard RCA connectors and interconnect cable. Simple and effective. Each RIAA filter is supplied in full colour branded box packaging for easy display.</p>

### Control your power supply

For almost 20 years, IsoTek has been developing internationally award-winning products that ensure a clean, all-round optimised power supply for all audio and home cinema components. They enhance the performance and playback quality of amplifiers and source devices as well as TV screens and projectors, and also protect valuable components from surges and dips.

IsoTek SMART Power combines the company's expertise in power conditioning with sophisticated programming capabilities. The three models, Alpha, Delta and Theta, provide professional installers with power management, control and security monitoring via RS232, LAN and WLAN through a secure online interface and dedicated codex for Control 4 and Crestron.

### Control at the touch of a finger

The SMART Power products can be fully controlled remotely via various access points, including a specially developed smartphone app available for iOS and Android.

Name the individual outputs and switch them on and off remotely, programme switch-on and delay times in the event of a restart. Find out about power consumption and create product groups.

Regulate the power consumption of your system or installation.

		Total wattage:	2.300 W (230V) / 1.150 W (115V)
		Surge protection:	54.000 A
		Dimensions (W X D X H):	448 x 305 x 89 (BxTxH)
		Mounting:	19 inch rack system (removable)

### Smart Power programmable power management

IsoTek SMART Power combines the company's power cleaning expertise with the ability to centrally programme the power supply. Installers can manage the three SMART Power models Alpha, Delta and Theta via the RS232 interface, LAN or WLAN, as well as integrate them into smart home systems from Control 4 and Crestron.

1802010	5060296411565	<b>Alpha SMART - black</b>	<b>1.879,00 €</b>
1802011	5060296411558	<b>Alpha SMART - silver</b>	
		Number of outlets:	8 x C14 IEC
		Mains voltage	100-240V / 50-60Hz
		Maximum current:	10 A
		Total wattage:	2.300 W (230V) / 1.150 W (115V)
		Surge protection:	54.000 A
		Dimensions (W X D X H):	448 x 180 x 44,5 (BxTxH)
		Mounting:	19 inch rack system (removable)

# CLEAN POWER, PURE SOUND

The first input into any audio or AV system is electricity, it is the 'raw material' from which the electronics you own needs to function. The quality of this first input will affect performance either positively or negatively.

The mains supply is distorted by numerous factors, this erodes the performance of high-quality audio and AV systems. As the electronic devices we use proliferate and the demand for electrical power intensifies, the quality of the electricity we feed our systems continues to slide.

The escalation of mains-borne 'noise' means that the need for IsoTek's clean-power technology has never been greater. 'Differential mode noise' is especially exacerbated by the switch-mode power supplies that are common in many modern devices, from computers to kitchen appliances. 'Common mode noise' is ever-increasing thanks to wireless networking in the home, with mobile phones, wi-fi and Bluetooth bathing us in a sea of airborne interference.

The quality of electricity we use to feed our audio or AV systems has a profound effect on performance.
