The finest high-end components from Slovakia

The Slovakian electronics specialist CANOR has been developing and producing high-quality audio products for 25 years. The manufacturer attaches particular importance to ensuring that its products combine excellent sound quality, state-of-the-art electronics, ease of use and unique aesthetics.

In order to achieve the most musical sound characteristics possible, CANOR uses tubes in most of its products - the prototype of the first series-produced integrated tube amplifier TP101 was presented at the trade fair in Brno (Czech Republic) in April 1995.

It goes without saying that CANOR only uses tubes of the highest quality, which are selected according to the strictest criteria and tested on unique measuring devices developed especially for CANOR.

The quality of each product is checked before delivery using state-of-the-art analogue Audio Precision measuring equipment and after recording in extensive listening tests. Only with this effort - according to the CANOR company philosophy - is it possible to manufacture products of such high quality and reliability for many years to come.

CANOR is represented by IDC Klaassen in the markets of Germany, BeNeLux, France and - in co-operation with the local distributor Digitalcom GmbH - Switzerland.
